Exposed Aggregate Concrete Paving

Product : Aggrepave  
Client : BITWISE  
Main Contractor : S P Design Developer LLP  
Location : Baner  
Date : Jan 2017

# AGGREPAVE

Exposed Aggregate Concrete Paving

## THE CHALLENGE

The Client, **BITWISE GLOBAL**, was looking for a different, aesthetically pleasing paving solution for their **TERRA-TOWER PROJECT** driveway in place of traditional, dull, bland paving options like tremix, paving blocks.

## OUR SOLUTION

Aggrepave – exposed aggregate paving provided here is a unique combination of the strength of concrete and aesthetic appeal of decorative aggregates – making it suitable for the fire tender loads with superb aesthetics. Being Cast – in – Situ, the number of joints is very less, thereby creating seam-less surfaces.

The aggregates used here were recycled & re-used which helped the project's green building rating.
