# CAR PARK SURFACING

# jaisons Construction

## Car Park Surfacing

Typical car parking area undergo significantly higher level of abrasion and impact as compared to any part of the building. Continuous rubbing of tyre against concrete generates dust thus downgrading the cleanliness of the ambience. Moreover, concrete is porous in nature, thus any oil spillage from vehicle gets absorbed by it leading to stain persistence. The friction offered to tyre by bare concrete is also less which can be detrimental specially for ramp and turning area.

We at Jaisons Construction Solutions provides innovative and durable for solutions for the car parking flooring. These products and system have been developed on the basis of more than 30 years of experience in the flooring business. The solutions are focused around developing better construction practice and with our practical

## Deck CRS Spray Applied Concrete Resurfacing System

DECK CRS is spray on cementitious based polymer modified two part system designed for concrete restoration, protection and resurfacing. It is stable against sunlight and thus can be applied to external areas. It transforms plain concrete surfaces to an aesthetically pleasing and abrasion resistant one.

EXTARNAL CAR PARKING

## DECK FLOOR PU Heavy Duty Polyurethane Car Park system

Deck Floor PU is polyurethane based two component heavy duty floor coating system. It has excellent bonding, flexibility, abrasion resistance and stain resistance properties. It can be used as top coat for textured DECK CRS surfacing system for car park.

## Deck Screed Ready - Mix Screed based on Premium Quality River Sand

Deck Screed is a pre - blended, ready to use concrete with controlled shrinkage based on special hydraulic binder, graded aggregates and addiives. Available in ready - to - use bags, it makes the application easy and fast. It is designed to make levelling course when the concrete is having undulations more than 10 mm.

INTERNAL CAR PARKING

## Deck Screed SL High Performance Ready - Mix Self Leveling Screed

Deck Screed SL is a pre-blended, ready-to-use, fast setting concrete with controlled shrinkage based on special hydraulic binder, silt/dust free graded aggregates and additives. High strength material for leveling course. Deck Screed SL can be used as concrete flooring in place of vacuum dewatering flooring (TREMIX) system without compromising strength and durability.
