Location : Punvale, Pimpri chinchwad.
Date : Ongoing

SPRAY BOND

High Adhesion Bonding Agent

THE CHALLENGE

The bonding of gypsum plaster to the internal walls and specially ceilings is a widely known challenge. Traditional methods such as hacking are highly labour – intensive and yield poor outcomes.

OUR SOLUTION

A specially formulated spray applied bonding agent SPRAY BOND is applied by spray to the soffit of the slab. SPRAY BOND provides chemical as well as mechanical bonding to the gypsum plaster and eliminates the need of hacking.

More than 4,00,000 Sq.ft of ceiling area for Siyona Project has been covered with SPRAY BOND.
