Location : Kharadi  
Date : Ongoing

# PARK SURF

Car park surfacing system

## THE CHALLENGE

The World Trade Center, Pune, houses many top IT companies with large number of employees and a larger number of Vehicles in its basement parking. More than 1000 vehicles use the Ramps & Driveways in the multi-level parking per day. The client, here, were looking for a durable and anti-skid surfacing for the driveways and ramps to avoid skidding of cars at sharp turns.

## OUR SOLUTION

Park Surf is a heavy – duty spray – applied, Car – Park surfacing system. Being cementitious, it becomes an integral part of the base and does not debond. The rough texture imparted to the surface with the spray and quartz sand makes Park surf skid and abrasion resistant. A top coat of sealer imparts shining, glossy finish & easy cleanability.
